If you break or lose a HASP 4 or Parallel dongle and you do not have a Software Maintenance Agreement, they can no longer be replaced.

All software updates from APRIL 2010 onwards will require HASP HL's.

**Upgrade your HASP 4 or Parallel dongle NOW to continue receiving software updates**

### HASP 4 & Parallel Dongle Swap-Outs / Replacement

#### FREE OF CHARGE UPGRADE

- From HASP 4 & Parallel Dongles to the latest HASP HL's

Please note that we are currently upgrading all HASP 4 and Parallel dongles to the latest HASP HL (USB) version. This upgrade is available **FREE OF CHARGE** to all clients with a valid and current Software Maintenance Agreement.

The new HASP HL dongles offer improved security, support of the latest versions of Windows and USB technologies as well as being able to support up and coming new software developments, for example the option to run in 'single user network mode' (i.e. for remote working).

If you are currently using a HASP 4 or Parallel Dongle (*please see picture below*), please contact us immediately to arrange a replacement, as all software updates will **NOT** support HASP 4 or Parallel Dongles from April 2010 onwards.
